Product Hunt

Launch websites

In 2022 [Product Hunt](#) started to disappoint the users by not being able to fix the bot problem. Makers started to get frustrated with their launches. This is how a need for a Product Hunt alternative appeared.

Here are the most significant ones:

Devhunt.org

Devhunt is a Product Hunt cloned aimed for dev tools only. The absolute majority of projects launched there are open-sourced.

Since Devhunt is for dev tools only, you can submit only tools that are used by developers: API, SDK, framework, library, monitoring tool, testing tool, npm package.

Uneed.best

Uneed is a Product Hunt alternative with a touch of freedom and good taste. Users can list their products as being on sale and share discount codes/offers.

The best products are mentioned in the newsletter (6,000 people as of July 16, 2024).

Microlaunch

A place to launch your micro startup. Offers an ability to sell early bird offers (usually LTDs).
