

Launch websites

In 2022 [Product Hunt](#) started to disappoint the users by not being able to fix the bot problem. Makers started to get frustrated with their launches. This is how a need for a Product Hunt alternative appeared.

Here are the most significant ones:

[Devhunt.org](#)

Devhunt is a Product Hunt cloned aimed for dev tools only. The absolute majority of projects launched there are open-sourced.

The screenshot shows the DevHunt website interface. At the top, there is a navigation bar with the DevHunt logo, a search icon, a 'Browse tools' dropdown menu, an 'Advertise' button, and a 'Submit your Dev Tool' button. Below the navigation bar, there is a prompt: 'Vote for your favorite dev tool this week 🗳️'. The main content area displays a list of five dev tools, each with a circular icon, a title, a description, and a list of tags and impressions. To the right of each tool is a voting button with an up arrow and a number.

Tool Name	Description	Tags	Impressions	Votes
Pocket Alert	All important notifications in one place!	Subscription • DevOps • Monitoring	1084 Impressions	17
TopTool	Explore the Best Tools: Discover, Vote, and Contribute!	Free • DB • Marketing	1315 Impressions	7
Brewer X	A powerful Homebrew client to manage Mac apps, scripts, and fonts	One time fee • CLI • NoCode	1080 Impressions	6
FastPocket	Build your app fast with FastPocket	One time fee	787 Impressions	3
GitEstimate	Calculate Your GitHub Estimate worth \$.	Free	679 Impressions	3

Since Devhunt is for dev tools only, you can submit only tools that are used by developers: API, SDK, framework, library, monitoring tool, testing tool, npm package.

Unneed.best

Unneed is a Product Hunt alternative with a touch of freedom and good taste. Users can list their products as being on sale and share discount codes/offers.

The best products are mentioned in the newsletter (6,000 people as of July 16, 2024).
